COTTON MARKETS.

advance in the cotton market to-day on covering and fresh buying, inspired by bullish crop accounts and continued drought in the Southwest, with the close steady at a net gain of 13@19 points. The market opened steady at an advance of 4@3 points in response to firm cables and quickly sold up to a net gain of 22@27 points on September and August, and of 11@13 points on later new crop deliveries as a result of seneral buying, attributed to a private local report making the average condition of the crop 73.2 per cent. as of August 11, against 78.4 per cent. as of July 25, On the recent decline of over half a cent a pound from the high records there had been talk of an improvement in the condition of the crop paying to the better weather over the Enstern belt, and this report, showing a deterioration of over 3 per cent, in the prospect, caused active covering as well as fresh buying for long account. Realizing by recent buyers and selling by people who had carried cotton over the decline, but had been rendered nervous by the break checked the advance, which was followed by reactions of 5@6 points from the best during the middle of the day. Trade interests appeared to be buying on the set-back, however, and in the afternoon active new crop positions sold into new high ground for the day with Ootober touching 13.76, or 18 points net higher. The close was a shade off from the top under realizing. Bullish operators argued that since August 11 there had been a furthey deterioration in the Southwest, owing to continued dry, however, and to day's official weather re-

Receipts at the ports to-day were 6,779 bales against 1,287 last week and 2,814 last
